

PureRx

2025 Prescription Drug List

Effective: January 1, 2025

Introduction

This formulary provides a complete list of medications covered under the **PureRx Standard 4-Tier Prescription Drug Program** associated with your health plan. It is designed to help you and your healthcare provider(s) in selecting the most effective and cost-efficient medication(s) for your specific medical condition(s). Medications are organized first by the condition they treat and then alphabetically by drug name. They are divided into four tiers, which indicate the members' cost share—tier 1 has the lowest cost share, and tier 4 has the highest. This formulary is subject to change without notice, so please visit <https://sbmabenefits.com/purrx-standard/> for the most up-to-date version.

Cost Share (Copay) by Drug Tier: Tier 1: \$15, Tier 2: \$30, Tier 3: \$50, Tier 4: \$75

The copay amounts listed are based on a unit quantity of 30 for a 30-day supply; pricing may vary based on quantity and supply.

Step Therapy:

In certain situations, your health plan may require you to try one medication before it covers another for that same medical condition. For instance, if both Drug A and Drug B are approved to treat your condition, your plan might require your doctor to prescribe Drug A first. If Drug A does not work for you, then your plan may cover Drug B.

How to Use This Formulary:

1. Use the **Index** at the beginning of this document to locate the medication category.
2. Navigate to the **corresponding section** to find your medication.
3. Identify the **tier level** next to the drug name to determine your potential out-of-pocket cost.
